

# MTAShare™

Automated Material Transfer Agreements

MTAShare™ is a comprehensive, automated system for rapidly creating, processing, executing and managing MTAs through a browser-based web portal. MTAShare™ utilizes nationally recognized and accepted standardized MTA templates in the automated creation of MTAs, which significantly reduces drafting and negotiation time.

## Key Benefits

- Shorter MTA transaction times
- Cost savings in MTA processing/management
- Increased feedback and tracking
- Reduced researcher frustration
- Fewer opportunities for error
- Archival record

---

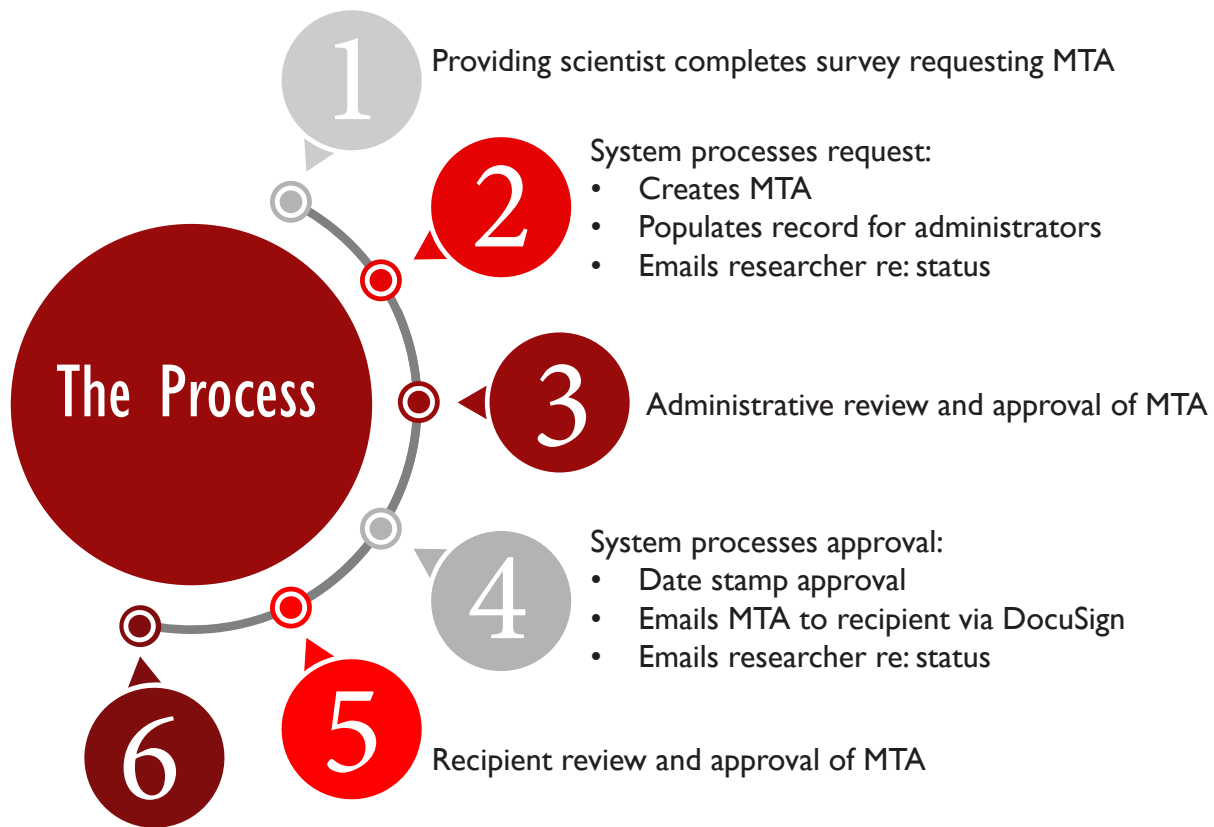

## Key Principles

- Provider initiated: providing institutions generally get to decide what MTA template to use for the transaction
- Only nationally-recognized standardized MTAs used
  - No need to read or negotiate base language in the MTAs.
  - Additional terms can be easily added in Exhibits, and are highlighted and negotiable
- System not initially developed for many industry MTAs, MTAs with other systems like Addgene, and unique transactions such as 3-party MTAs

System finalizes transactions:

- Emails all parties copy of MTA via DocuSign
  - Instructs providing scientist OK to send
  - Uploads MTA into MTAShare and date stamps
-
